

Heavenly Seating and our manufacturing partner are fully committed to promoting and preserving a clean and safe environment. Through the use of product components such as soy-based cushion foam, toxic-free water based adhesives, formaldehyde free recycled plywood and upholstery materials made from recycled fibers our chairs express our desire to minimize our impact on the environment.

More than 70% of the corrugated carton materials we use for shipping are manufactured from Post-consumer, or post-industrial recycled material. We have chosen to utilize scraps of foam from our manufacturing process as cushioning materials inside our shipping cartons rather than expand the use of corrugated materials. This is yet another way in which we strive to be good stewards of our natural resources.

Natural lighting and compact fluorescent bulbs are used exclusively within our company offices to further reduce our carbon footprint. We are proud to stand as a leader in the responsible conservation of our natural resources.
